

C-Programming Assignment

Ansh Patel

23-August 2025

21 Net salary

```
#include <stdio.h>

int main() {

int gross, _net_salary, allowance, deduction;

printf("Enter gross: ");

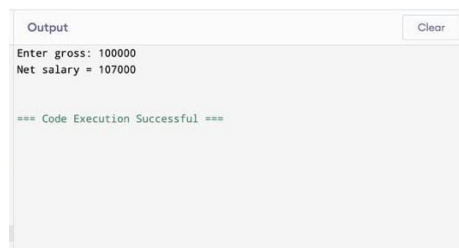

scanf("%d", &gross);

(allowance = (gross * 10) / 100), (deduction =
(gross*3) / 100), (_net_salary = gross + allowance -
deduction);

printf("Net salary = %d\n", _net_salary):

return 0;

}
```

```
Output Clear  
Enter gross: 100000  
Net salary = 107000  
  
=== Code Execution Successful ===
```
