22 Net sales after discount

```
#include <stdio.h>

int main() {

    int gross, net;

    printf("Enter the gross sales: ");

    scanf("%d", &gross);

    net = gross - (0.10 * gross);

    printf("Net sales after discount = %d\n", net );

    return 0;

}
```
